Is funny that in an obscure market segment like demolition game there could be such bad attempt that doesn't compare with the already bad market leaders.. DO NOT BUY. Bad controls no option looks likeu2665u2665u2665u2665u2665and it plays likeu2665u2665u2665u2665u2665 i regret buying this game.. For the low low price of 3.99 (20% discount at time of writing) you get an uninstall and refund simulator ALL IN ONE!!!. Played this game before it was released here and like it so much! It is cool and graphics metter nothing.. For the low low price of 3.99 (20% discount at time of writing) you get an uninstall and refund simulator ALL IN ONE!!!. Bought this game expecting a fun sandbox game, but I got a game with poor graphics, awkward contols (sensitivity is very high, unable to change), and just boring gameplay. This game is NOT worth your money.

Hell, I wouldn't install it if it were free. Most MOBILE games are better than this. The game looks like it was created in 30 minutes. And whoever programmed the controls was probably drunk.. DO NOT BUY. Bad controls no option looks likeu2665u2665u2665u2665u2665and it plays likeu2665u2665u2665u2665u2665 i regret buying this game.
