I need to replace all occurrences of "foe" to "dog" in the file bar, so the end result will look like /some/folder/inside/this/path/to/file/dog.bar. Any advice how to do this? I tried using sed to find and replace (?) but I am not sure how to specify a regex pattern. Thank you! A: cat file | sed -e 's/foe/dog/g' # flag: will perform a global replacement cat file | sed -i 's/foe/dog/g' Background ===== A survey of quality of life (QoL) in children with cerebral palsy (CP) and their families was conducted to help identify areas for care improvement. Methods ===== A total of 105 parents of children with CP at the University of Nebraska Medical Center were sent questionnaires by mail. The survey consisted of questions on the severity of CP, duration of diagnosis and symptoms, perception of mental health status, family functioning and the family's experience with the health care system. The children's age at diagnosis, type of CP, and motor severity were recorded. The children's Gross Motor Function Classification System (GMFCS) level, Pediatric Evaluation of Disability Inventory (PEDI), Caregiver Strain Index (CSI), and Center for Epidemiologic Studies Depression Scale (CES-D) were also obtained. A total score (range 0 to 45) and three subscales of the PEDI (Activities, Participation and Environment) were compared between two groups: GMFCS I-III (n = 52) and GMFCS IV-V (n = 53). Results The mean total PEDI score was 19.6 (SD 5.4) in the GMFCS I-III group and 21.8 (SD 8.2) in the GMFCS IV-V group. The Activities and 82157476af
